Art Unit: 2815

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 11, 12, 14, 23, 24, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Fig. 1, Applicant's admitted prior art.

See the previous Office action.

***Allowable Subject Matter***

2. Claims 8-10, 13, 15-22, and 25-28 remain objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Claim 29 is allowed.

The following is an examiner's statement of reasons for allowance: as per the above discussion, the applicant's admitted prior art fails to teach wherein the first side surface is adjacent to the second side surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

4. Applicant's argument filed 07/21/04 have been fully considered. Applicant argued that "the bond wire 164 should not be read in the scope of the claimed invention, as the first conductive body is disposed "continuously on the first active surface and the second active surface"...". The examiner respectfully disagrees. Because the claim cites "a first conductive body disposed continuously on the first active surface and the second active surface only but not on, eg, a first and/or second side surfaces"; and the term "continuously" is defined as, eg, "without interruption" which is clearly shown by the bond wire 164 in Fig. 1. Even if the recitations, such as, eg, "a first conductive body...., extended directly from the first active surface to the second active surface..", note that there is no structure claimed in these claims that could distinguish them over Fig. 1. The remarks are noted, however, as established above which clearly meet the recitations in the present claim(s), and is simply not patentable.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2815

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

***Telephone Inquiry Contacts***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jasmine J Clark whose telephone number is (571) 272-1726. The examiner can normally be reached on Flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (571) 272-1664. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
